PART III. REMARKS

MAY 3 0 2007

§ III.1 AMENDMENTS TO CLAIMS

- 4. In Applicant's previous REPLY/Amendment Paper filed 30 March 2007 in response to the first Office Action, Claims 1-60, 64-67, and 69-80 were cancelled, and Claims 61-63, 68, and 81-89 were presented for prosecution. In the Final Office Action dated 26 April 2007, Claims 61-63, 68, and 81-89 were all finally rejected by the Examiners. In the Present Amendment Paper, Claims 61, 82, 85, 87 and 88 are amended.
- 5. The amendments herein (especially to Claims 88) after the final rejections are necessary, because before the final Office Action, Applicant was not given an opportunity to "develop clear issue" with the Examiner, and was not given a "full hearing". During the telephone interview conducted on 29 March 2007, which was before Applicant's REPLY to the first Office Action, with respect to the amendments proposed by Applicant during the Interview, the Supervisory Examiner agreed that, "Proposed amendments seem on the surface to overcome the [35 USC] 102 Deleeuw rejections". See the Examiners' "Interview Summary" filed 04/04/2007, and Applicant's "STATEMENT OF SUBSTANCE OF INTERVIEW" filed 29 March 2007. As a result thereof, Applicant did not consider it necessary to include more claim limitation (especially to Claims 88) to further distinguish the claimed invention from DELEEUW.
- 6. However, in the Final Office Action, all the presented claims, which were amended / rewritten according to the outcomes of the telephone interview on 29 March 2007, were again rejected by the Examiners on the same grounds.
- 7. Therefore, there exists good and sufficient reason why the amendments herein are necessary and were not earlier presented. 37 C.F.R. §1.116(b)(3). See also MPEP § 706.07 ("Before final rejection is in order a clear issue should be developed between the examiner and applicant.")
- 8. The proposed amendments to Claims 61, 82, 85, and 87 are for the purpose of presenting these rejected claims in better form for consideration on appeal. 37 C.F.R. §1.116(b)(2). The

PAGE 09/17

amended claims are directed to substantially the same subject matter. Thus, if the Examiners maintain that no allowable subject matter can be found therein, in the ensuing action, the Examiners may apply the same rejections set forth in the Final Office Action dated 26 April 2007.

§ III.2 AFFIDAVIT / DOCUMENTARY EVIDENCES

- 9. The Affidavit / Documentary Evidences herein are necessary to support Applicant's arguments traversing the Examiners' rejections. There is good and sufficient reason why such Affidavit / Documentary Evidences are necessary and were not earlier presented. 37 C.F.R. §1.116(e). As set forth above, during the telephone interview on 29 March 2007, with respect to the amendments proposed by Applicant during the Interview, the Supervisory Examiner agreed that, "Proposed amendments seem on the surface to overcome the [35 USC] 102 Deleeuw rejections". See the Examiners' "Interview Summary" filed 04/04/2007 and Applicant's "STATEMENT OF SUBSTANCE OF INTERVIEW" filed 29 March 2007. As a result thereof, Applicant did not consider it necessary to submit any Affidavit / Documentary Evidences in support of Applicant's traverses of the Examiners' rejections. However, in the Final Office Action, all the presented claims, which were amended / rewritten according to the outcomes of the telephone interview on 29 March 2007, were again rejected by the Examiners on the same grounds.
- 10. Thus, again, Applicant was not given a "full and fair hearing" and an opportunity to develop clear issues before filing the REPLY to the first Office Action. See MPEP § 706.07.

Respectfully Submitted

tide-waster /tidwawtor, -wntor/ n. 1 water brought

TIDE

The gravitational pull of the Moon and, to a lesser degree, that of the Sun cause the tides. The pull is strongest on the side of the Earth facing the Moon, causing the oceans on that side to bulge out. The pull affects the solid Earth slightly icss, but still enough to cause it to pull away from the ocean on the other side, creating a second ocean bulge. As the Earth rotates, each part of the ocean rises and falls twice a day, causing two high tides and two low tides. When the Sun and Moon form a right angle with the Earth, their pulls counteract, causing small, or neap, tides. When they are in line, their pull is combined, creating large, or spring, tides.

hulge Moon's gravitational mill Sun's gravitational pull
